

Cause & Effect Sheet

☆ Freddy & Fix's Dancing Raisins — Episode 2 ☆

Let's solve the mystery!

BEFORE the experiment...

My Prediction

What do you think will happen?

.....

.....

What Actually Happened

What really happened?

.....

.....

What's happening?

Fill in the cause-and-effect story.

1

Bubbles stick to raisin

2

Raisin floats up

3

Bubbles pop, raisin sinks

Let's test more objects!

Fill in your results.

Object	My Prediction (Will it dance?)	What Happened (Did it dance?)	How Long It Danced (Seconds)	Drawing
1 Raisin				
2 Grape				
3 Corn Kernel				
4 Pasta				
5				
6				

SCIENCE WORDS TO REMEMBER!

BUOYANCY

The upward push of water that helps things float.

CARBON DIOXIDE

A gas that bubbles form in the water during our experiment.

DENSITY

A measure of how heavy something is for its size.

COMING NEXT!

Episode 3: Balloon Rocket Race

Can your balloon rocket go the farthest?
